## ALDBURY LANTERN AND COLUMN EXAMPLES

For the Aldbury Green location we would recommend either the 3<sup>rd</sup> lantern from the left or the 2<sup>nd</sup> lantern from the right. These are LED warm white output and can carry gas mantle effect visual for daytime appeal.

The costing quoted for the new heritage column and matching lantern is the worst case scenario, this can be reduced depending on lantern choice.

New column example, showing collar and ladder arm embellishments.

If required, a reclaimed and refurbished 6m tall cast iron column can be supplied at extra cost.  
Please contact us for further details.
